

# Las Vegas W·O·M·A·N

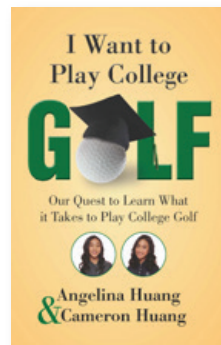

**Y**ou might know Dr. Victoria Chen as the co-founder of one of the most trustworthy and dominating interdisciplinary dental specialty groups in Las Vegas, but her impact on the world around her extends far beyond the dental chair.

As a speaker, teacher, and author for thousands of doctors and hygienists throughout the United States, she's published six books and has been recognized as one of the top doctors in her field.

"I founded Significance Dental Specialists & Orthodontics with my husband, Dr. Allen Huang, and together, we've opened four locations throughout Las Vegas, helping more than 15,000 patients get access to excellent patient care, cutting edge technology, and affordable financing," says Dr. Chen.

"We offer virtual consultations and online check-ups. We use technology like Micro-osteoperforation™ (MOP®), VPro+™, and Wilckodontics to help move teeth faster - without compromising safety and comfort. Our treatments come with a 100% satisfaction guarantee, and because we understand that braces are a significant investment for our patients, every aspect of our care centers around making sure our patients have a straight, beautiful smile that will last throughout their entire life."

*In 2021, Victoria's daughters published their own book and have since donated over \$5K of the book proceeds to Las Vegas U.S. Kids Golf, the Shriners' Children Hospital, and Safe Nest.*
